

# National Weather Service Tampa Bay Area, Florida

## Severe Weather Potential for **Wednesday Morning to Thursday Morning** Issued 230 PM Tuesday April 4 2017

**Overview:** North Central Florida is under a Slight Risk for severe weather from Wednesday morning into Thursday morning. A Marginal Risk for severe weather is forecast for central Florida. An approaching cold front focusing moisture across north central Florida and upper level dynamics will produce showers and thunderstorms over the Florida Wednesday into Thursday. Some severe storms are possible with the potential for isolated tornadoes.

### Impacts:

- Strong to severe damaging gusty winds and large hail.
- Periods of heavy rain that may cause minor street flooding.
- Frequent deadly lightning.
- An isolated tornado possible.
